BEST Fleet Deals for Business

... make freedom of speech a company policy

if you can't save money with this then you're doomed

If you are only concerned with how much your phone bill is costing, consider the price you pay for your business not communicating effectively. Our new fleet rate for businesses gives your team the freedom to talk to each other at anytime, on any phone, wherever they're working – for the same flat rate of just 10c for 5 minutes.

the first fleet plan to cover all your business calls 24/7

Some companies offer fleet rates for certain types of calls – for example mobile to mobile, or perhaps calls back to the office. But calling a mobile from the office, or even calls to your other offices will be charged at standard rates. They give with one hand and take with the other.

be the BEST business fleet

We on the other hand offer the same 10c for 5 minutes rate for all types of calls within your business: mobile to mobile, mobile to fixed, fixed to fixed and fixed to mobile. And to make things even simpler it's available 24 hours a day, 7 days a week. So wherever your team is based you'll know everyone can keep in touch for the same low rate.

the freedom to roam on australia's biggest mobile network

Fleet rates aren't much use if your team is out of range, so our mobile plans use the Telstra network so they can get in touch when it matters.

get your mobile and office calls on one bill

Not only can you enjoy one flat rate for all your office and mobile calls, but you'll enjoy seeing them all on one bill, enabling you to analyse your communications spend to gain maximum efficiencies. Both our bills and Online Account Management Service can provide helpful insights into your communication spend, such as:

- Summary by Call Duration Most Frequently Called Numbers
- Summary by Departments Most Expensive Calls
- Summary by Date Longest Phone Calls
- Summary by Hour of Day International Call Spend

... or call us today to find out more about how to get your business talking!

*Things you should know:

- Fleet call charges are ex GST and apply for the first 5 minutes of any call between services on the same account number only (excluding local calls & mobile roaming calls).
- Standard call rates apply after the first 5 minutes.
- To be eligible for mobile fleet calls you must agree to a 12 or 24 month fixed-term contract on a minimum monthly spend of \$10 or more. Early termination fees apply.
- To be eligible for fixed line fleet calls you must be a 'full service' customer and have at least one mobile service on the same account.
- 'Full service' includes routing your local, national, international and calls to mobiles via us.
